Supra Website update 10/12/09

In the coming weeks we will be upgrading our KIMweb website and each week leading up to the change, we will be sending out information on how the tools will assist you in managing your listings. This week we are showing the new Listing Inventory tool.

Focused on Listings

If you're a Seller's Agent, you've probably received feedback on a listing that said it was a little high compared to comparable listings. If you're a Buyer's Agent, you've probably shown a home that your customers loved, but didn't want to go to the top of their price range. In either event, the Seller just agreed to reduce the price and you want to get the word out and make sure those interested customers get a second chance to make a buying decision.

- No problem! Easily send a pricing change or other update to all the agents that showed the listing.
- Want to make sure they remember the listing? Add a picture of a listing and it will appear in your inventory page as well as in showing reports for all the agents that showed your property.

You'll love how the new SupraWEB works for you!
